

Decoration ➤ Decoração

Everything was thought in detail in this carefully painted picture, for an intense communication with the senses, to be experienced by a cosmopolitan couple with two kids - a teenager and a child - in love with aesthetic and a constant wish to keep up-to-date. In this 1 to 4-bedroom home, in Matosinhos, the decorators were challenged to create harmonious atmospheres, decorated with detail, comfort and quality. The minimalist architectural stroke and the generous areas - 260 square-meters - of this model apartment in the Edifício do Parque, from RAR Imobiliária, have allowed it. It had wideness and enough light. The perfect ingredients to bring in the limitless creativity of these creators of sumptuous sceneries... The aesthetic would have to

be connected to functionality and well-being, in a magnificent combination of pieces, criteriously disposed and comfortable textures - which resulted in "velvet, sober, natural and semi-transparent". Atmospheres with their own language which communicated intensely with the senses - appealing to the touch and seductive to the vision. Soon art was made and melody has sounded with the innovative and creative touch of Empatias in the teenager's bedroom and in the TV room, of Marta's in the dining and living rooms and of Cassio Associados in the main suite, in the children's room and entrance hall.
